

BOSTON
BOATWORKS
BUILDING EXCELLENCE

Boston Boatworks 44 Offshore Express

Welcome

When Mark Lindsay and I first imagined Boston Boatworks, we agreed that the most interesting and valuable relationships in our lives are formed at the water's edge. That personal revelation became the guiding principle of our company.

To engage interesting long-term customers, all we had to do was build the kinds of boats they wanted to own, which happened to be exactly the kinds of boats we wanted to build—high performing, safe, and comfortable offshore yachts with graceful lines, and beautiful, durable designs that reflect their intended purpose. Three hundred and sixty delivered yachts later, we are blessed with an extraordinary portfolio of long-lasting customer and professional partner relationships, and wonderful friendships!

Our founding philosophy has remained a constant and has led us to the development of the BB52 and the BB44 Offshore Express models, the first two limited-production yachts celebrating the Boston Boatworks' brand. These proprietary models are a new generation of aesthetic excellence, continuing Boston Boatworks' long-standing collaboration with our award-winning colleagues Zurn Yacht Design of Marblehead, Massachusetts, and London-based Winch Design. We bring together Doug Zurn's timeless yacht design, with the Winch team's brilliantly innovative and stunning interiors, and Boston Boatworks' high performance build processes and unwavering customer support.

Boston Boatworks continues to build the efficient, durable, fair, and uniquely strong composite yachts that have become our exclusive signature. For 27 years, our team of dedicated professionals has prided itself on building excellence. Consistently meeting this standard is our honor. With every project, we collaborate, ask questions, learn, innovate, engineer, discover, have fun, and continue to raise the bar higher. May we introduce you to the BB52 and the BB44?

We look forward to learning about how you, and your family and friends, most enjoy time on the water!

Best regards,
Scott Smith
CEO & Owner

Start Here,
Go Anywhere.

The Boston Boatworks 44 Offshore Express

London-based Winch Design created innovative and elegant living spaces that draw in abundant light and fresh air, yielding an interior that is bright, spacious, functional, and effortlessly sophisticated. Amidships there is a large u-shaped galley to port and an L-shaped settee with a dinette to starboard. Head up a few steps and the galley transitions seamlessly into the saloon.

The BB44 is perfectly suited for a cruising couple. The large forepeak master features a walkaround (nearly) queen-sized berth, lots of natural light, a large hanging locker, and an ensuite head. Boston Boatworks is bringing a new caliber of offshore express cruisers to the US market—stunningly beautiful yachts that pair timeless design with modern performance, and are a downright pleasure to operate.

SPECIFICATIONS & GENERAL ARRANGEMENT

An L-shaped settee and table in the cockpit are perfect for alfresco dining. | A transom door to starboard provides easy access to the large swim platform. | For kids and adult guests, the saloon and pilot house tables lower to become double beds (the saloon's curtained for privacy) and both have independent nighttime access to the head.

THE BOSTON BOATWORKS 44 TEAM

BOSTON BOATWORKS

Our greatest resource is our talented team, from composite experts to customer-care specialists. We are highly skilled, experienced, process-driven professionals, passionate about every aspect of the build process, from initial design, to supporting you from your first day on the water to the day you sell your Boston Boatworks boat. The BB44 is a truly special yacht, a collaboration between the men and women at our boatyard, and leading innovators in our industry. Learning on our long-term partner Zurn Yacht Design for hull and exterior design was the key first step. Adding London-based Winch Design for the interiors brought us a new level of refinement. Our vision for success is measured by the relationships we build on the water—including our customers, designers, employees, dealers, and our friends in the boating community.

ZURN YACHT DESIGN

Zurn Yacht Design is known for the fine aesthetics and performance of its builds in power and sail. Since its beginnings in 1993, the firm has won acclaim for more than 575 launches of designs commissioned by a growing list of custom and production clientele. The lines of Doug Zurn designs are a union of state-of-the-art sensibility and classical style, combined with Zurn's years of hands-on experience at boatyards and marinas, including Boston Boatworks. Each Zurn design—whether a runabout, a shoal-draft daysailer, a Down East lobster yacht, an offshore express cruiser, or a retro-styled, fast commuter yacht—illustrates a commitment to technology and innovation, along with a devotion to comfort and aesthetics. Based in Marblehead, Massachusetts, the company offers end-to-end design and engineering services.

WINCH DESIGN

Andrew Winch's love of yachts began in childhood, during long summers spent sailing the Solent aboard his father's 42-foot Beneteau. After completing his degree in 3D design at Kingston College of Art, he furthered his connection to the water as a skipper in the Caribbean, followed by an apprenticeship for acclaimed yacht designer Jon Banenberg. This passion for the sea and the yachting community reached its culmination in 1986 when Andrew, along with his wife, Jane, founded Winch Design. In the nearly four decades since Winch Design was established, the business has grown, and today boasts an award-winning design portfolio that includes sailing yachts, motor yachts, beach villas, mountain retreats, private aircraft, and more. Through their partnership with Boston Boatworks, Winch Design continues their entry into the American production boat market with the introduction of the BB44.
